Texas Well Owner Network Cypress Creek Watershed

The Texas Well Owner Network (TWON) program is an educational training offered by the Texas A&M AgriLife Extension Service. TWON is a free, one-day educational training for residents who want to become familiar with groundwater resources, septic system maintenance, well maintenance, water quality and water treatment. Private well owners are independently responsible for operating their wells and monitoring the quality of their water. The training will primarily focus on water quality issues in the Cypress Creek Watershed as well as efforts by the Cypress Creek Watershed Partnership, Texas Water Resources Institute and the Texas State Soil and Water Conservation Board to improve water resources in the area.

Bring your well water samples:

Well owners may bring a water sample to the training to be screened for nitrate and total dissolved solids (TDS). For \$10, the Guadalupe-Blanco River Authority Regional Laboratory will test for *E. coli* bacteria in a separate container. Pick up approved sample bags and containers with instructions at the Hays County and Blanco County Extension offices. Bring samples and payment of \$10 to the training on September 12.

Pre-register for the workshop:
